SUMMARY

Technical Operations Specialist & Software Developer with a degree in Computer and Robotics Education from the University of Nigeria. Over 3 years of experience in **Full-Stack Development**, technical market analysis, and digital asset management. Expert in building responsive web applications, troubleshooting hardware/software interfaces, and managing cloud-based infrastructure to drive data-driven results

EDUCATION

B.Sc. (Ed.) Computer and Robotics Education | Degree Requirements Completed (Certificate in View)

University of Nigeria

Key Focus: Robotics Systems, Computer Architecture, and Educational Technology.

SKILLS

Software Development & Engineering

- **Full-Stack Development:** Proficient in building front-end and back-end architectures for web applications.
- **Version Control & Deployment:** Experienced in managing project files, downloaded packages, and Git-based workflows.
- **Technical Troubleshooting:** Ability to diagnose and fix faults within complex hardware and software interfaces.

Cloud & Infrastructure

- **Cloud Administration:** Managing data via AWS S3, Google Drive, and Dropbox Business.
- **Virtual Private Servers (VPS):** Deploying and maintaining 24/7 remote server terminals for trading bots and application hosting.
- **SaaS Management:** Administration of enterprise tools including Slack, Microsoft 365, and Trello.

Data, FinTech & Maintenance

- **Quantitative Analysis:** Utilizing live data feeds and charts for risk management and mitigation.
- **Technical Operations:** Execution of preventive maintenance and firmware configuration for PLC and Arduino controllers.

SOFT SKILLS

- **Technical Documentation:** Writing comprehensive "How-to" guides and system manuals for end-users.
- **User Training:** Simplification of complex technical concepts for non-technical stakeholders.
- **Curriculum Design:** Designing instructional materials for STEM and technical training centers.

PROJECTS

TECHNICAL PROJECTS

Full-Stack Web Application & Data Management

- **Cloud-Based Student Portal:** Engineered a lightweight data management system for real-time academic record tracking using modern web technologies.
- **Robotics Integration Framework:** Developed a research-based framework utilizing automated sensors to optimize vocational productivity and system efficiency.
- **AI-Assisted Prototyping:** Experienced in utilizing AI tools to generate functional source code, troubleshoot complex logic, and manage project file architectures.
